You may reprint uncopyrighted SLCC Journal articles in any non-commercial form, provided excessive praise is given the author and the SLCC. However, what is written within may be PBS.

## Old Year / New Year

As the annual December meeting / party rolled around, everything seemed to be going the way it always does - all bollixed up. First and foremost we had not been able to locate a place to hold our meetings and the library was all but closed so our happy home of the last fourteen years was no longer available to the club. This seemingly insurmountable problem has happily been remedied, thanks to our lone remaining token female member, Mildred Lepley, who has located what seems to be an ideal meeting location. Many thanks Millie. Information and directions will be in other parts of this newsletter.

According to notes supplied by "El Presidente" the December meeting was started on time and a good time was had by all. Everybody who should have been there was in attendance except for yours truly who was cooped up at home with the great granddaddy of all colds. I would like to thank Bob Woolley for stepping in at the last minute and ordering and delivering the cake for the party that I was to supply. (Hope it was worth the \$150 dollars he charged me.)

Bob Scholar demonstrated the December 8Bit Floppy in his usual well-practiced manner. The arcade type game Rambling Gambling was well received and entertaining.

The raffle prizes were highlighted by a complete 1040 ST system that had been donated to the club. In accordance with long established crooked raffle procedure the winner of the 1040 was the Presidents brother. All other winners were lackeys of the ruling party. Like every other month your long-suffering Secretary didn't win anything at all, the only difference is I was able to save the cost of a ticket.

With everybody full of ice cream and cake the final meeting at the "old" San Leandro Library came to a close.

## Other Happenings

As the year drew to a close the only interesting computer happenings are those concerning my good friend Willie Gates and the Department of Justice.

IBM, SUN, and Netscape must really be worried about MSIE4 to squawk so loud. But in the long run justice will prevail. The Judge in the case has already figured out that it only takes three mouse clicks to remove IE4 from windows? (Three clicks to remove several hundred thousand lines of code?) But of course the Judge is impartial and will render a fair and impartial decision.

**Jim Moran - secretary**

## NEW MEETING LOCATION

The SLCC has been meeting in the San Leandro Library for the last 14 years or so. Sadly, the Library is closing for seismic reconstruction and we must find a new location to hold our meetings (this should not be big news to you all....) To our good fortune, Millie Lepley has offered the St. Leander School facility as an alternative for the club meeting.

St. Leander is just three blocks west (towards 1880) of the Library, on the south side of Davis street. Park in the playground at the rear of the school and use the entrance located there.

For those of you who haven't been in school for awhile, no gum chewing, carving on the desks or drawing on the bathroom walls!!

See ya there!!
